

National Cyber League

Fall 2023 Competition Season

Registration for the NCL Spring 2023 Season is open Aug. 21 - Oct. 6

Register: cyberskyline.com/events/ncl

The National Cyber League, powered by Cyber Skyline, is a virtual, learning-centered cybersecurity competition designed to bridge the gap from curriculum to careers!

Open to US high school and college students, the NCL Competition provides students with hands-on experience solving real-world cybersecurity challenges. Students perform exciting tasks such as auditing vulnerable websites, identifying breaches from forensic data, and more.

Aug. 21 - Dec. 15

Gymnasium

Prepare for NCL with guided challenges

Oct. 9 - 15

Practice Game

Participate in an unranked game

Oct. 20 - 22

Individual Game

Compete & show off your individual skills

Nov. 3 - 5

Team Game

Collaborate with your team
(team size: 1 -7)

Each school may register multiple teams of any size

The Benefits of NCL:

Improve Skills

Our self-paced learning resources and skills assessments enable students to identify their strengths and areas for improvement.

Prepare for Future Careers

Students apply their cybersecurity knowledge to solve real-world scenarios, which prepares them to enter the cybersecurity workforce.

Earn a Scouting Report

The Scouting Report provides evidence of how a student performed in the competition, making it a great resource to present to employers when applying for jobs or internships.

Have Fun!

NCL creates a fun, online environment for students to not only build their skills, but to also have fun while doing it!

Skills covered:

Cryptography

Password Cracking

Log Analysis

Enumeration/Exploitation

Scanning

Network Traffic

Web App

Open Source

Forensics

No specialized hardware or software necessary. You can even start playing NCL from a Chromebook!
